

ECO CLUB

GOVERNMENT DEGREE COLLEGE NOHRADHAR

The **Eco Club of Government Degree College Nohradhar** plays an important role in promoting environmental awareness and responsible behavior among students and the local community. The club works with the belief that protecting nature is our shared duty and that small actions can bring big positive changes. Through various activities, the Eco Club encourages students to understand environmental issues and take practical steps to protect natural resources.

The main aim of the Eco Club is to create awareness about cleanliness, conservation of nature, and sustainable living. It motivates students to keep their surroundings clean, reduce pollution, and respect biodiversity. The club also helps students develop leadership qualities, teamwork, and a sense of social responsibility while working for environmental protection.

During the academic session **2025–26**, the Eco Club successfully organized two major activities. The first activity was a **Cleanliness Drive**, in which students actively participated in cleaning the college campus and nearby areas. This drive helped spread the message of “Clean Campus, Green Campus” and encouraged students to maintain hygiene and cleanliness in their daily lives. It also made students aware of the harmful effects of waste and plastic on the environment.

The second activity was an **Eco Awareness Program**, which focused on educating students about environmental problems such as pollution, climate change, and deforestation. Through simple talks, discussions, and interactive sessions, students learned the importance of saving water, planting trees, and protecting natural resources. The program inspired students to adopt eco-friendly habits and become responsible citizens. Overall, the Eco Club of Government Degree College Nohradhar is working sincerely to build environmental awareness and promote a green and clean future. The club continues to inspire students to contribute positively towards nature and society.
